# Precautions

Before mounting the sound bar on a wall, be sure to read the following precautions for safe installation. Be sure to follow the precautions.

## ■ Precautions for mounting the sound bar on a wall

### CAUTION

- For proper installation of the sound bar on a wall, make sure to have the work done by the dealer from where you purchased the unit or by a contractor with qualified service personnel. Some skills and experience are required for safe installation.
- Be sure to follow the precautions when mounting the sound bar on a wall. The sound bar may fall, resulting in injury.
  - Do not attach it to a wall constructed of weak materials such as drywall or plasterboard.
  - Use screws that are of the size specified in this guide and that can support the weight of the installation. Do not use nails, two-sided tape, screws other than the size specified, or screws that are worn out or damaged.
  - Fix the cables in place so nothing will accidentally catch on them.
- Check that the sound bar is securely fixed in place immediately after the installation. Yamaha will bear no responsibility for any accidents caused by improper installations.

## ■ Precautions after installation

### CAUTION

- Do not lean on the wall-mounted sound bar or apply excessive force to its top. Doing so may cause the sound bar to fall.

Items to use for wall mounting installation

# Items to use for wall mounting installation

Make sure that all of the following items are present before installing the sound bar.

## ■ Items included with this product

- Spacers (×2)

- Mounting template

## ■ Commercially available items

In addition to the included items, the following commercially available items are required.

- Screws (×2)

Use round head wood screws of the following size:

## ■ Tools

Use the following tools for installation.

- Screwdriver  
Use a screwdriver that matches the screws.
- Pencil  
Use to mark the positions for the screws on a wall.
- Tape or thumbtacks  
Use to temporarily attach the mounting template to a wall.

## Mounting the sound bar on a wall

- Before mounting the sound bar on a wall, be sure to read the following precautions.
- “Precautions” (p.4)

Use the screw-hanging holes on the sound bar to mount the sound bar on a wall.

Mounting the sound bar on a wall

NOTE

The top of the sound bar is equipped with built-in height speakers that output the sound of the height channels. A space of at least 10 cm (4 in) above the top of the sound bar ensures unobstructed output of the height channels. This will provide you the best possible surround sound field.

1 Attach the mounting template (included) on a wall temporarily.

2 Mark the positions for the screws on the wall using a pencil.

- 3 Remove the mounting template from the wall.
- 4 Install the spacers (included) and screws at the points marked on the wall.

Be sure to use screws of the following size.

**NOTE**

You can also install the spacers by hanging them on the screws after installing the screws first.

- 5 Connect cables to the sound bar.

For the connection procedure, see the Quick Start Guide or User Guide of your product.

**6 Hang the sound bar on the screws.**

The installation and connection are completed.
